Monday Oct.10

12-1:30pm (OWP/P offices; conference room 22C)

SUSTAINABLE DESIGN PROCESS Geoff Walters, OWP/P

As creators and shapers of the built environment, OWP/P realizes the greater impact of our work on a global scale. Geoff will explore OWP/P's Project Process and illustrate ways in which sustainability is infused into every step.

Tuesday Oct.11

12-1:30pm (OWP/P offices; conference room 22C)

MARKETING STRATEGIES FROM THE CLIENT'S VIEW

Al Manshum, Advocate; Sue Morss, Argonne; Brad Soderwall, Hines

Nationwide, executives across a wide range of industries have embraced sustainable building design as a differentiator in response to competitive business conditions. Join OWP/P for a panel discussion among leaders from Advocate Healthcare, Argonne National Laboratory and Hines as they discuss the characteristics that led these organizations to embrace environmentally sensitive architecture. Elizabeth Scholl from Ecolibrium®, an interdisciplinary environmental braintrust based in Bozeman, Montana, will moderate the discussion and a short Q&A session.

Wednesday Oct.12

12-1:30pm (OWP/P offices; conference room 22C)

NEWCASTLE WORK: ENVIRONMENTAL PLANNING/IMPLEMENTATION INTO LANDSCAPE Peter Stutchbury

In 2003 Peter Stutchbury was the first architect ever to win the top National Architecture Awards from the Royal Australian Institute of Architects for both residential and non-residential projects with the Robin Boyd Award for houses for the Bay House at Watson's Bay, Sydney, and the Sir Zelman Cowan Award for Public Buildings for 'Birabahn', the Aboriginal Cultural Centre at the University of Newcastle, designed with Richard Leplastrier and Sue Harper.

5:30-7pm (UIC Arts and Architecture Building 845 W. Harrison St.)

EVENING LECTURE WITH PETER STUTCHBURY: SURVIVAL OF THE FITTEST

Thursday (Oct.13)

12-1:30pm (OWP/P offices; conference room 22C)

LESSONS LEARNED Dan Cronin, Turner

How does Turner integrate sustainability into everyday practices and with special LEED-Certified projects? Dan Cronin highlights issues throughout the construction process and Turner's experience working on One South Dearborn.

Friday (Oct.14)

12-1:30pm (OWP/P offices; conference room 22C)

THINKING DAYLIGHTING David Eijadi, The Weidt Group

Daylighting is the primary passive solar design strategy in commercial buildings. It has the potential to reduce lighting energy, which can be 40% or more of the energy cost of a commercial building. Join David Eijadi to review common mishaps in our risk-averse construction industry where even limited failures can dramatically slow the advance of valid technologies.
